- Enter your original email address, Submit and the program will then send you an email with a validation link, User name and new password. You must logon in using that link to validate your information.
- Your original email address is in the system. If you do not use this, it will tell you it is not in the system and you are dead.
- Contact us with your user name and we will retrieve it from the database and sent it to you. After you log in properly you will be able to change it, as stated above.
- When it recognizes the log in you will see the “User Control Panel” in the upper left corner.
- Here you can then go to the Profile tab, Edit Profile and fill in the starred items.
- You can enter your preference for a signature in your postings.
- Go to Edit account settings to change your email address or password to what you would like. At the bottom you must use the password sent to you that you logged in with. Submit.
- These settings will then take effect of the next log in.

If this site ever asks you “What is the name of the sail on the foredeck of an EC12,” I hope you know the answer. It is not case sensitive. This is effort to thwart web robots from creating log in accounts and spamming the site.
